PROBLEM:

SAMPLE OUTPUT:

Sample Output:

```

      _____
      | Here is our works on Assignment 2, Programming II. My name is Irdina and my partner's name is Jannah! |
      |_____|

Let's try our program:
Enter number 1: 6
Enter number 2: 3
You've entered number 1 is 6 and number 2 is 3.
The larger number is number 1 which is 6.
6 to the power of 3 is 216.
Choose ONE Operator:
(1) ADDITION
(2) SUBTRACTION
(3) MULTIPLICATION
(4) DIVISION
Operation to perform: 3
Result of number 6 and number 3 is 18.
Thank you for using this program!
```

IPO CHART

INPUT	PROCESS	OUTPUT
num1 num2 operation	void displayNum(int n1,int n2) { Print_You've_entered _number_1_is_n1_and _number_2_is_n2.; }	Print_displayNum(num1,num2); Print_displayBig(num1,num2); Print_displayPower(num1,num2); Print_displayOperation(num1, num2,operation); Print_displayFarewell();

```
