

SCENARIO

“

”

NAME	MATRIC NO	GROUP
IRDINA NADHIRAH BINTI BAHANUDDIN	22C18G026	2

PROBLEM:

In this challenge, a farmer is asking you to tell him how many legs can be counted among all his animals through C++ program. The farmer breeds three species:

Chicken

Duck

Cow

SAMPLE OUTPUT:

Sample Output:

IPO CHART		
INPUT	PROCESS	OUTPUT
Chicken	Total_legs_of_chicken=2*Chicken	Print_Total_legs_of_chicken
Duck	Total_legs_of_duck=2*Duck	Print_Total_legs_of_duck
Cow	Total_legs_of_cow=4*Cow	Print_Total_legs_of_cow

--	--	--

PSEUDOCODE:

Start

Prompt Chicken

Read Chicken

Prompt Duck

Read Duck

Prompt Cow

Read Cow

Total_legs_of_chicken=2*Chicken

Total_legs_of_duck=2*Duck

Total_legs_of_cow=4*Cow

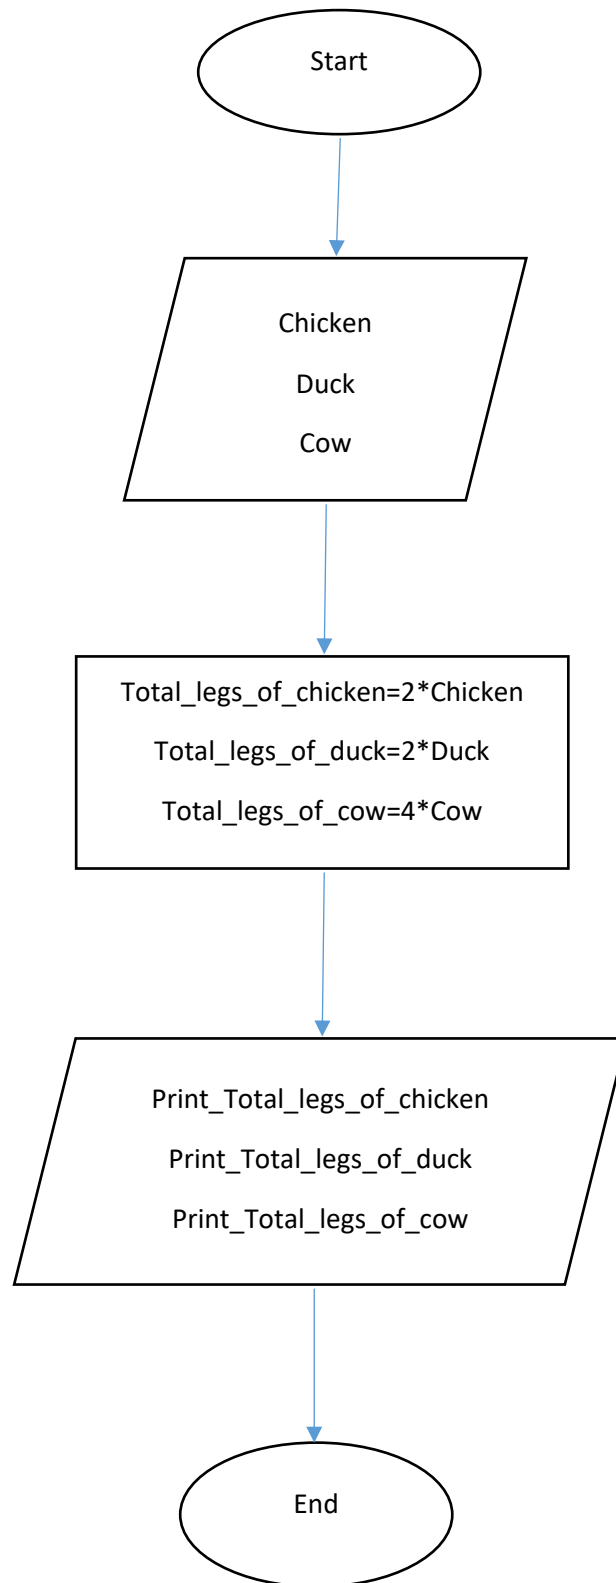

Print_Total_legs_of_chicken

Print_Total_legs_of_duck

Print_Total_legs_of_cow

End

FLOWCHART:

C++ PROGRAM:

```
#include <iostream>
```

```
using namespace std;
```

```
int main()
```

```
{
```

```
    int Chicken;
```

```
    int Duck;
```

```
    int Cow;
```

```
    int Total_legs_of_chicken;
```

```
    int Total_legs_of_duck;
```

```
    int Total_legs_of_cow;
```

```
    cout<<"Sila masukkan jumlah ayam = ";
```

```
    cin>>Chicken;
```

```
    cout<<"\nSila masukkan jumlah itik = ";
```

```
    cin>>Duck;
```

```
    cout<<"\nSila masukkan jumlah lembu = ";
```

```
    cin>>Cow;
```

```
    Total_legs_of_chicken=2*Chicken;
```

```
    Total_legs_of_duck=2*Duck;
```

```
    Total_legs_of_cow=4*Cow;
```

```
    cout<<"\nJumlah kaki ayam adalah "<<Total_legs_of_chicken;
```

```
    cout<<"\nJumlah kaki itik adalah "<<Total_legs_of_duck;
```

```
    cout<<"\nJumlah kaki lembu adalah "<<Total_legs_of_cow;
```

```
    return 0;
```

```
}
```
